

Change in MED services

Both Ocean Alliance and THE Alliance services from MED to US East are merging into one single service as from early December.

The 2 existing services are deploying 4500 TEU vessels. The new one will deploy 8500 TEU vessels. The total capacity is slightly lower.

However in case of delays or blank sailings, alternative are very limited ; for instance, from FOS, there is no direct sailing alternative (only via Algeciras with Maersk or Valencia with MSC).

Carriers are announcing this is to recover from low freight rates and improve the service reliability as we have all noted less accuracy and more lead times in worldwide shipments.
