

Examples of security measures in place :

- Selection procedures for all of our service providers
- Systematic inspection of empty containers
- High security bolt seals used on all containers and numbers recorded and checked from collection point to delivery
- Containers stored in secure areas
- Information sent to US Customs in compliance with AMS requirements
- Additional information provided to US Customs Brokers to file ISF 10+2 requirements correctly
- Security training provided for our staff
- Information technology integrity maintained to protect data.
